Application/Control Number: 10/017333 Page 2

Art Unit: 3743

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, drawn to a cleaning apparatus in both installed and kit form, classified

in class 165, subclass 231.

II. Claim 19, drawn to a method of retrofitting a refrigerator, classified in class 62,

subclass 303.

The inventions are distinct, each from the other because:

Inventions I. and II. and are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method as claimed can be practiced by materially different apparatuses, such as by the two (separately claimed) systems disclosed in the specification. Moreover, the apparatus as claimed in claim 1 need not be assembled by the process claimed in claim 19 (it could be done in the factory in a new installation).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/017333

Art Unit: 3743

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Page 3

In the event the apparatus claim (Group I) are elected, applicant must elect one of the following species:

This application contains claims directed to the following patentably distinct species of the claimed invention: first species wherein the motor is an SSC motor (Figs. 1 and 10, beginning at page 10, line 10) and

second species wherein the motor is an RPSC motor (Figs. 1A and 12, beginning at page 18, line 6).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations

Application/Control Number: 10/017333 Page 4

Art Unit: 3743

of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to John Ford at telephone number 308-2636.
